JAHNAVI MUSIBOINA

AI / MACHINE LEARNING | COMPUTER VISION | DATA SCIENCE

jahnavi.jaan119@gmail.com | +91-9014195619

PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science graduate with hands-on project and internship experience across computer vision, machine learning classification, data analysis, recommendation systems, and full-stack application development. Developed a CNN-based skin analysis and product recommendation project using Python, PyTorch, and OpenCV, demonstrated through a local application. Built telecom customer churn classification models using Logistic Regression, Decision Tree, and Random Forest during data science internship work. Also contributed to a full-stack sports academy discovery and enrollment application using React, Node.js, Express, and MySQL. Interested in entry-level AI/ML engineering, machine learning, and computer vision opportunities.

TECHNICAL SKILLS

Programming: Python, JavaScript

Machine Learning: Classification, Logistic Regression, Decision Tree, Random Forest

Deep Learning & Computer Vision: PyTorch, Convolutional Neural Networks (CNN), OpenCV, image preprocessing

Data Analysis: Telecom customer data analysis, pattern identification, Microsoft Excel

Web Development: HTML, CSS, React, Node.js, Express

Database: MySQL

Professional Skills: Verbal and written communication, project management fundamentals

AI / MACHINE LEARNING PROJECT

AI-Based Skin Analysis and Product Recommender | November 2025 – April 2026

- Developed an AI-based application concept that analyzes facial skin images and provides skincare product recommendations.
- Used Python, OpenCV, and PyTorch to support image preprocessing and CNN-based visual feature learning.
- Applied CNN-based classification to identify skin characteristics and visible concerns from facial images.
- Designed the recommendation component to suggest skincare products based on detected skin characteristics and concerns.
- Demonstrated the project through a local application; the source code is available on GitHub (repository URL to be added).
- Model evaluation results are available and should be included with the exact metrics, test setup, and dataset details after verification.

Technology stack: Python, PyTorch, OpenCV, CNN

INTERNSHIP EXPERIENCE

Full-Stack Developer Intern | IIDT BlackBuck Engineers, India | May 2025 – July 2025

- Developed a full-stack web application to help athletes discover and enroll in suitable sports training programs.
- Implemented a recommendation feature using sport type, skill level, and location to suggest suitable sports academies.
- Built application functionality using HTML, CSS, JavaScript, React, Node.js, and Express.
- Used MySQL to manage application data for users, academies, schedules, and enrollments.

Data Science Intern | ExcelR, India | July 2024 – August 2024

- Analyzed telecom customer data, including service usage, complaints, plan types, and satisfaction, to explore patterns associated with customer churn.
- Built classification models using Logistic Regression, Decision Tree, and Random Forest to identify customers at risk of churn.
- Used model-based analysis to derive insights intended to support proactive customer retention and reduce potential revenue loss.

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science

Lingayas Institution of Management and Technology, Vijayawada

November 2022 – April 2026 | CGPA: 7.0

CERTIFICATIONS

- Data Processing and Visualization — FutureSkills Prime (2025)
- Exploratory Data Analysis — FutureSkills Prime (2025)
- Acquiring Data — FutureSkills Prime (2025)
- Data Science / Machine Learning — ExcelR (August 2024)
- Java Full Stack Development — BlackBuck Engineers (July 2025)
- AI & ML — SmartBridge (March 2026)
- Quantum Fundamentals — Qbitech (2026)
- Data Science for Beginners — Board (2026)
- NPTEL — Skill India (2025)

ACHIEVEMENTS

- Received an Outstanding Certificate at college for FutureSkills Prime.
- Received a college certificate for successfully completing an NPTEL course.
