ABOUT ME

As a fresher with strong communication skills and a positive, growth-oriented mindset, I am eager to learn, develop professionally, and contribute effectively in a professional environment.

EDUCATION

2022-2026 **Bachelor of Technologies**

Lingayas Institution of management & technology — Artificial Intelligence and Data science

2020-2022 **Intermediate** Narayana Jr college

2020 **SSC** Ravindra Bharathi school

PROJECTS

IIDT-BLACKBUCKS

Developed a Sports Academy Recommender and Enrollment Portal, a full-stack web application that simplifies how athletes and sports learners discover and join suitable training programs. The platform features a smart recommendation system that suggests academies based on user preferences such as sport type, skill level, and location, making it easier for users to find the best fit for their goals. I built the front end using modern web technologies like HTML, CSS, and JavaScript with a framework such as React, and implemented the back end with Node.js and Express (or Python/Django), supported by a relational database like MySQL to manage users, academy profiles, schedules, and enrollments securely. The project also includes secure user authentication, role-based dashboards for students and administrators, and online payment integration to handle registrations and fee processing efficiently. This portal improves accessibility to sports training by centralizing academy information, automating the enrollment process, and enhancing the overall user experience

SKILLS

- HTML
- Time management
- Communication
- Leadership
- CSS
- Teamwork
- Problem Solving
- Collaboration
